

Supplementary Material

This is the supplementary material to “Tips on Writing Papers in $\text{\LaTeX}$ ”. The references like equation numbers refer to those in the main paper, except for those prefixed by “S”. For example, we can reference Section I and (3) from the main paper but (S1) is from this supplementary material.

Similarly, we can cite [13], which is from the bibliography of the main paper. To include local citations like [SR1] that appear only in this supplementary. Note that we use `\citeSR` to cite these references, while `\cite` will cite references from the main paper.

SI. PRELIMINARIES

This is a section in the supplementary material. From a result in [SR1, Theorem 2] (note that this is a local citation that does not appear in the main paper), we have

$$f(\boldsymbol{\theta}) = \mathbb{E}_{X \sim p_{\boldsymbol{\theta}}} \left[\frac{f(X)}{g(X, Y)} \middle| Y \right], \quad (\text{S1})$$

$$\mathbb{P}(A | B) = \mathbb{P} \left(\left\{ \omega \in \Omega : \frac{1}{2} X(\omega) > b \right\} \middle| \limsup_{n \rightarrow \infty} X_n(\omega) = a \right). \quad (\text{S2})$$

SII. PROOF OF THEOREM 1

Note that Theorem 1 is stated in the main file. We can reference (1) from the main file, or (S2), a local equation in this supplementary.
