

# Supplementary Material

This is the supplementary material to “Tips on Writing Papers in L<sup>A</sup>T<sub>E</sub>X”. The references like equation numbers refer to those in the main paper, except for those prefixed by “S”. For example, we can reference Section I and equation (3) from the main paper but (S1) is from this supplementary material. Similarly, we can cite [1], which is from the bibliography of the main paper.

## SI. PRELIMINARIES

This is a section in the supplementary material. From a result in [S-1] (note that this is a local citation that does not appear in the main paper), we have

$$f(\boldsymbol{\theta}) = \mathbb{E}_{X \sim p_{\boldsymbol{\theta}}} \left[ \frac{f(X)}{g(X, Y)} \mid Y \right], \quad (\text{S1})$$

$$\mathbb{P}(A \mid B) = \mathbb{P} \left( \left\{ \omega \in \Omega : \frac{1}{2} X(\omega) > b \right\} \mid \limsup_{n \rightarrow \infty} X_n(\omega) = a \right). \quad (\text{S2})$$

## SII. PROOF OF THEOREM 1

The proof follows from (S2).
