

Supplementary Material

This is the supplementary material to “Tips on Writing Papers in L^AT_EX”. The references like equation numbers refer to those in the main paper, except for those prefixed by “S”. For example, we can reference Section I and (3) from the main paper but (S1) is from this supplementary material.

Similarly, we can cite [13], which is from the bibliography of the main paper. To include local citations like [S-1] that appear only in this supplementary, the steps to be taken are:

- i) latex supplementary
- ii) bibtex lref.aux
- iii) latex supplementary
- iv) bibtex lref.aux
- v) copy lref.aux to lref-supplementary.aux, and lref.bbl to lref-supplementary.bbl
- vi) latex supplementary
- vii) latex supplementary
- viii) latex supplementary

These steps are automated in the lcite_.bat, lcite_.ps1, or lcite_.sh file. **If anyone can figure out a better solution, please let me know.** If you are using Overleaf, you need to copy the lref-response.aux and lref-response.bbl files to the Overleaf project folder.

SI. PRELIMINARIES

This is a section in the supplementary material. From a result in [S-1, Theorem 1] (note that this is a local citation that does not appear in the main paper), we have

$$f(\theta) = \mathbb{E}_{X \sim p_\theta} \left[\frac{f(X)}{g(X, Y)} \middle| Y \right], \quad (\text{S1})$$

$$\mathbb{P}(A | B) = \mathbb{P} \left(\left\{ \omega \in \Omega : \frac{1}{2} X(\omega) > b \right\} \middle| \limsup_{n \rightarrow \infty} X_n(\omega) = a \right). \quad (\text{S2})$$

SII. PROOF OF THEOREM 1

The proof follows from (S2).
